

Assignment 1

Q1

After sorting and deleting duplicates, there are 28 candidates

candidate set = $\{1,2,3\}, \{1,4,5\}, \{1,2,4\}, \{1,2,5\}, \{1,5,9\}, \{1,3,6\}, \{1,4,8\}$
 $\{1,2,6\}, \{1,8,9\}, \{1,5,8\}, \{1,3,8\}$
 $\{2,3,4\}, \{2,5,9\}, \{2,3,6\}, \{2,4,8\}, \{2,6,8\}$
 $\{3,4,5\}, \{3,5,6\}, \{3,8,9\}, \{3,5,9\}, \{3,4,6\}, \{3,6,8\}, \{3,7,8\}$
 $\{4,5,7\}, \{4,7,8\}, \{4,6,7\}, \{4,7,9\}$
 $\{6,8,9\}, \{6,7,9\}$

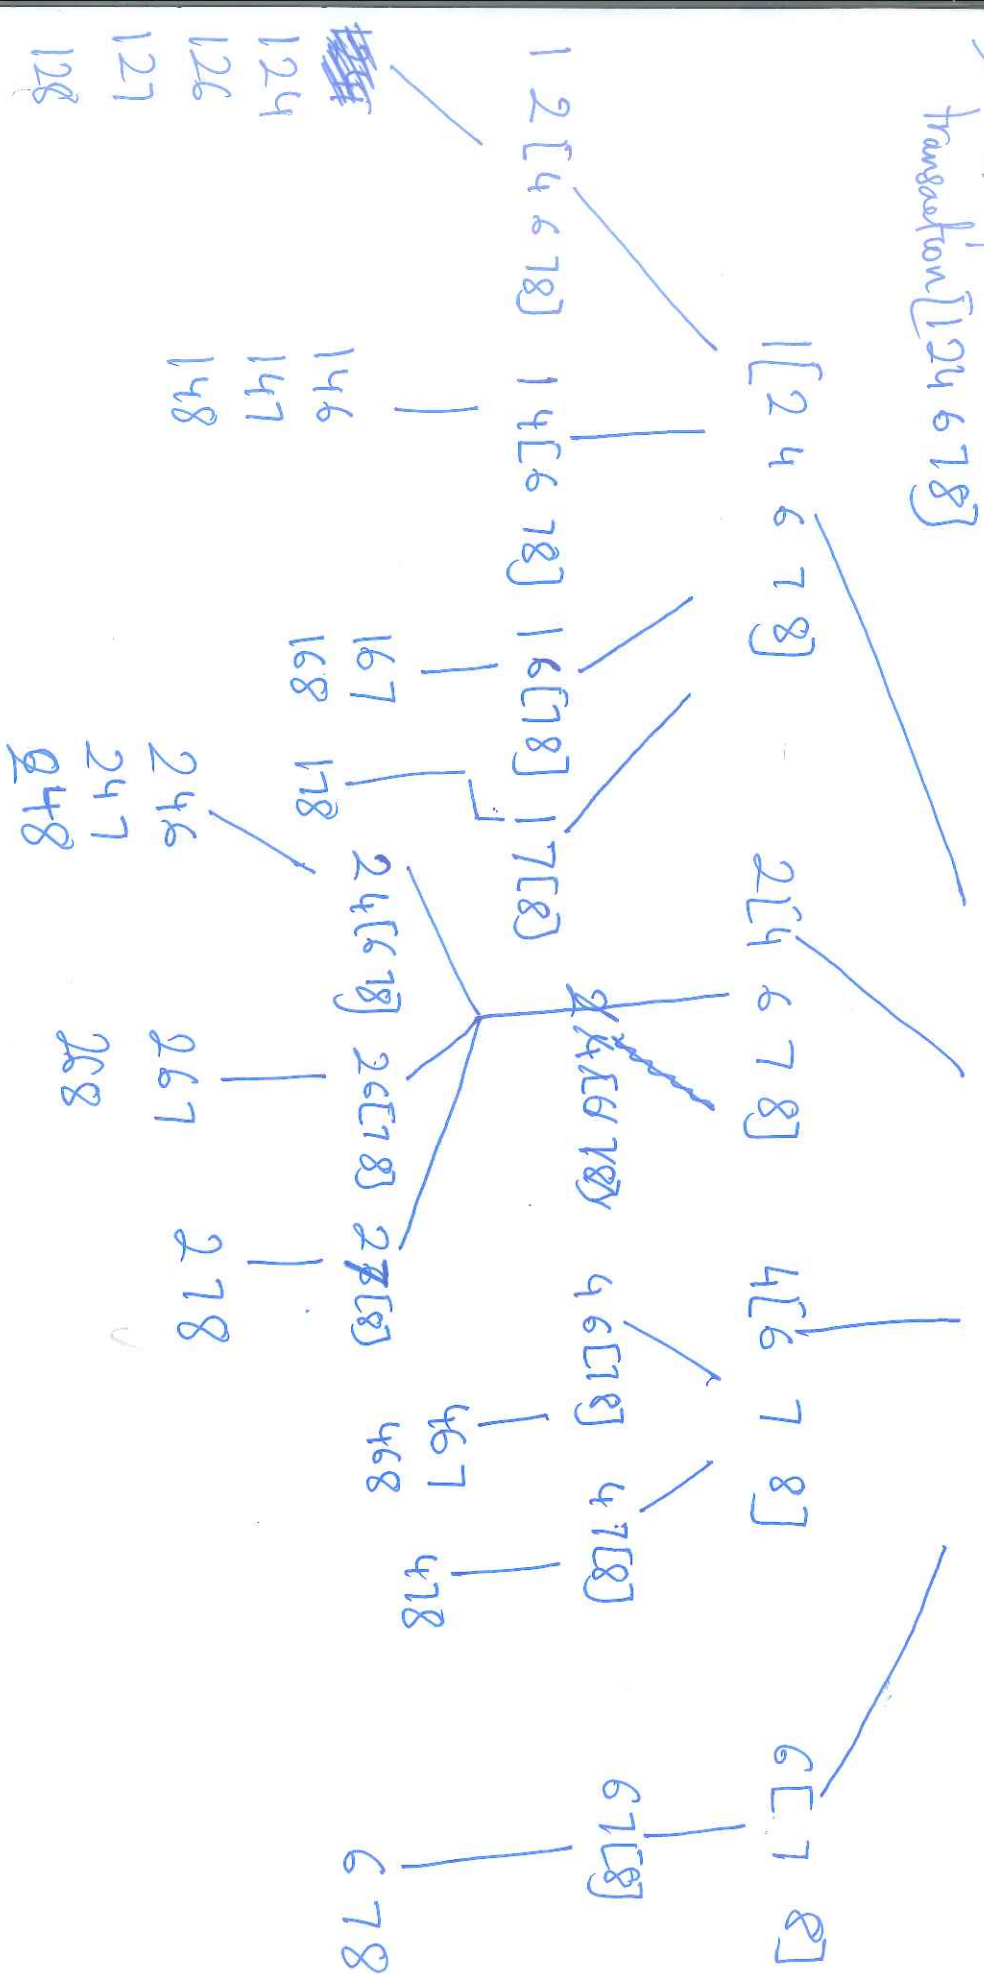

Hash Function

20 ~~the~~ comparisons

[] [] 3,5,6
 3,5,9
 1,3,8,9
 linked list → 1
 6,8,9

- 1.
- 2
- 4
- 6
- 7
- 8

2b)

Support threshold = 2

$\text{sup}(A) = 2$ $\text{sup}(C) = 1$

$\text{sup}(B) = 1$ $\text{sup}(D) = 2$

As $\text{sup}(B) < \text{minsup}$ and $\text{sup}(C) < \text{minsup}$

The resulting conditional fp tree for D is:

~~$\{A:D\}$~~

result:

$\{(A:1, D:1), (A:1, D:1)\}$

Hash Tree Output for Q1 (A)

[[[1, 4, 5], [1, 4, 8], [4, 7, 8]], [[[1, 2, 4], [4, 5, 7]], [[1, 2, 5], [1, 5, 8]], [[1, 2, 3], [1, 5, 9], [1, 2, 6], [1, 8, 9]]], [[1, 3, 6], [4, 6, 7], [1, 3, 8]]], [[[2, 4, 8]], [[2, 5, 9]], [[2, 3, 4], [2, 3, 6], [2, 6, 8]]], [[[]], [[3, 4, 5], [3, 7, 8]], [[3, 4, 6], [6, 7, 9]]], [[[]], [], [[3, 5, 6], [3, 5, 9], [3, 8, 9], [6, 8, 9]]], [[3, 6, 8]]]
